**Steve Jobs
(b. 24 Feb 1955)**

**Dennis Ritchie
(b. 09 Sep 1941)**

**Become a hipster,
sell stolen ideas.**

Invent UNIX and C

DIED 05 OCT 2011

DIED 12 OCT 2011

Without Steve Jobs, we would have:

- No iProducts
- No over-expensive laptops

Without Dennis Ritchie, we would have:

- No Windows
- No UNIX
- No C
- No programs
- A large setback in computing
- No generic text languages
- We would all read in binary

**Praised by media as Jesus
of computing**

Ignored

**They died in the same year, but it seems only few notice
the death of Dennis Ritchie compared to Steve Jobs**
