## Bleeding took over the world

,Hello

.as many friends may have heard about the security bug in the openssl service

This is the Heartbleed module of the openssl package, which is why this bug is named Heartbleed, which you can see in the openssl site

Code cve mitro Bug CVE-2014-0160

[https://www.openssl.org/news/secadv\\_20140407.txt](https://www.openssl.org/news/secadv_20140407.txt)

As 64KB of packets passing through the Transport Layer Security V1 protocol communications and stored in memory. If this operation is repeated, information from This includes the username and password of the server or the password of the administrators or the information of the users or any other useful information such as cookies

You can use the following portal to test whether your site is also vulnerable

<http://filippo.io/Heartbleed>

To patch this bug you can update your openssl to 1.0.2-beta2 or if you want to use the same old versions you have to compile the package again from the source without the Heartbleed module to Prevent bleeding from your heart

### about the weblog

The day the gentleman appears. The day will come .when the world will change

Hoping that day

.Use the `-DOPENSSL_NO_HEARTBEATS` switch to compile openssl without Heartbleed

Operating systems that are at risk and have this bug

:PHP code

```
(stable), OpenSSL 1.0.1e-2+deb7u4
4 LTS, OpenSSL 1.0.1-4ubuntu5.11
penSSL 1.0.1e-15
enSSL 1.0.1e-4
OpenSSL 1.0.1c 10 May 2012) and 5.4 (OpenSSL 1.0.1c 10 May 2012)
- OpenSSL 1.0.1e 11 Feb 2013
```

Many famous foreign sites such as alexa, yahoo, stackoverflow, etc. have this bug that they have already .patched

In addition to the mentioned foreign sites, many Iranian sites also had this bug, including our country's .banks and many important Iranian organizations and sites, or even many Iranian security teams However, we tried to report to webmasters as much as we could, but many of them still have this .dangerous bug

## - :- Microsoft.com.mk site hacked - :-

in the name of God

Sites [Microsoft.com.mk](#) and [WindowsXP.com.mk](#) by security teams [Iranian Dark Coders Team](#) was .hacked

Given Microsoft's covert activities against the Islamic Republic of Iran, as well as Microsoft's assistance to the creators of the dangerous Stuxnet virus, written by the US government and several other countries to sabotage Iran's nuclear power plants, we decided that this type Reveal Microsoft's secrets and declare that Microsoft is at the service of US and Israeli spy agencies and is secretly spying on users and countries that .use Microsoft products

## The anti-Shiite site kulalsalafiyeen was hacked by the team

In the name of God, the Most Gracious, the Most Merciful, an

.anti-Shiite site that mocks and insults Shiite beliefs was hacked by the team

The entire database was destroyed in the attack. If they do not have a backup, they will not be able to restore the site with the same information

We could not register in zone-h because someone registered the error page of this site in zone-h

## The Microsoft MSN site was hacked by the Iranian Dark Coders Team security team

in the name of God

. The **Microsoft MSN** site was hacked by the **Iranian Dark Coders Team** security team

Given the covert activities of Microsoft against the holy order of the Islamic Republic of Iran and helping the creators of **the dangerous Stuxnet virus**, which was written by the US ,government and several other countries to sabotage Iran's nuclear power plants

why despite the hundreds of nuclear warheads in US and Israel Does the company not spread any virus between the organizations of those countries? Does it even provide them with the ?latest security patches

So we decided to expose this kind of Microsoft secrecy and declare that Microsoft is at the service of US and Israeli spy agencies and is secretly spying on users and countries that use .Microsoft products and the interests of the country. Endangers the right of that country

:Proof link

:Proof link

<http://www.zone-h.org/mirror/id/19815641>

<http://append-hc.com/mirror/id/115922>

| :The zone-h site deleted about 300 sites that were onhold, one of which was the same tag

Thanks to the Iranian Dark Coders Team

## Button on Android

*A news came to me a few days ago that I got a botnet on Android*

*and I got a statistic. Yes, I wrote: Russian hackers write that its bots continue to work like a useful software inside*

*.... your phone. Until a TASK is set for it and an attack takes place*

*.It is more interesting that these malicious software are also available in the Android Market*

*.These bots send their own intelligent species through the communication channels of your phone*

## It is not proper for a believer to address people with such titles

After seeing the Supreme Leader's opinion on the use of "bastard" as follows, **this article was edited and an apostate was used instead of bastard.** Be satisfied by the Almighty

**Question:** "Greetings and greetings to the service of the Supreme Leader, Grand Ayatollah Seyyed Ali Hosseini Khamenei

.is a moral question that is asked of your enlightened presence

There are people in cyberspace who insult the 14 pure holy lights of the Shiites (PBUH) without fear of being completely identified. An insult that hears if it hears a stone and melts

But some friends call these people "bastards". Can you tell me if such a thing is right? What is the situation with the adjective "forbidden food

May God raise the blessed shadow of the Supreme Leader under the grace and ability of His Holiness and make the heart of the Imam of the Age (as) pleased and satisfied with you

**.Answer: It is not proper for a believer to address people with such titles**

. For the religion of this referendum , click **here** on the Agha website and set the tracking code to 343f32092845c0dd
