Alexander Batenev

Head of Software Development Department at Group-IB
Moscow, Russian Federation

Summary

Many thanks to everyone for the interest to my person, but at the moment I'm not looking for a job!

Head of several projects, all of them were started from scratch. Now all of these projects are working solutions... Yes, for at least 6-7 years I am working primarily as it-manager, but... I still love programming!

- Highload distributed systems (7dc all over the world->vrrp->kubernates->ingress/nginx->kafka/rabbit->go/c++/java/php/python->cassandra/elasticsearch/mongo/mysql/redis x NN instances)
- Highavailable microservices mesh (k8s, oauth2...)
- Deep knowledge in Networking & TCP/IP
- C++/C/Java/Golang/Javascript/Python/PHP
- In love (and it is mutual) with kubernates & distributed systems & solutions (and have a lot of practice!)
- And, btw, have some knowledge in information security :)

In past:
- Low level operating system programming (windows kernel module)
- Oracle (pl/sql) & Postgresql
- Android (Java)

Hobbies:
Football (soccer), travelling (of course!) & ... programming!

Experience

Group-IB
Head of Software Development Department
July 2011 - Present
Moscow, Russian Federation

KSI Corporation
Senior software developer
August 2004 - July 2011 (7 years)
