...c  
...y 40 days of unrelenting US-Israeli aggression that began on February 28, the United States on formally accepted Iran's comprehensive 10-point proposal as the foundation for a permanent

...ment that political pundits across the globe have described as a historic Iranian victory, Washington ... every core demand put forward by the Islamic Republic.

...sion, launched to decapitate Iranian leadership and cripple the nation's defensive capabilities, instead ... fragility of American power projection when confronted by sophisticated Iranian military technology ... ied front of the Axis of Resistance.

...utset, Iran's indigenous missile and drone systems, precision-guided munitions, and layered air- ... works delivered devastating strikes against enemy assets across the region, while coordinated ... n Lebanon, Iraq, Yemen, and occupied Palestine stretched US-Israeli forces to breaking point.

... day of the campaign, Washington had already begun seeking back-channel contacts, recognizing ... its strategic objectives could be achieved.

hours of Wednesday, the Supreme National Security Council confirmed the enemy's submission, paving the way for negotiations in Islamabad starting this Friday.

The agreement not only halts the US-Israeli aggression but also dismantles long-standing mechanisms of economic and political pressure, while Iranian forces remain on full alert to guarantee that every commitment is fulfilled.

The agreement, experts agree, stands as a testament to the effectiveness of Iran's asymmetric warfare doctrine and technological self-reliance forged under decades of sanctions.

According to the statement issued by Iran's top security body on Wednesday, the United States has agreed to a proposal that fundamentally commits Washington to:

- Cessation of aggression against Iran
- Withdrawal of Iranian control over the Strait of Hormuz
- Cessation of uranium enrichment
- Cancellation of all primary sanctions
- Cancellation of all secondary sanctions
- Implementation of all anti-Iran UN Security Council resolutions
- Implementation of all anti-Iran IAEA Board of Governors resolutions
- Provision of compensation to Iran
- Withdrawal of US combat forces from the region
- Cessation of war on all fronts, including against the Islamic Resistance of Lebanon (Hezbollah)

### Aggression against Iran

One of the proposals presented by Iran to end the imposed war binds Washington to refrain from any military action against Iranian territory or interests.

This agreement emerged directly from the battlefield reality in which Iranian air-defense batteries repeatedly shot down and destroyed incoming threats with remarkable efficiency.

Advanced phased-array radars and indigenous interceptor missiles proved capable of engaging low-observable cruise missiles at ranges that surprised enemy planners.

During the 40-day war of aggression, multiple attempted deep strikes and special-forces incursions were repelled before they could achieve their objectives, inflicting measurable losses on US-Israeli aviation and special forces.

The consistent performance demonstrated that Iran's defensive architecture had evolved into a robust, multi-layered system resistant to saturation attacks.

The administration's acceptance of this clause reveals profound embarrassment over its initial assumption of Iranian military weakness, according to military experts.

By accepting this guarantee, Iran has translated its military successes into a strategic shield that protects its national sovereignty while allowing resources to be redirected toward reconstruction and technological development.

### Iran's victory in regaining sovereignty over the Strait of Hormuz

A recent point affirms Iran's continued and unchallenged authority over the Strait of Hormuz, the vital waterway through which approximately one-fifth of global oil passes.

In the first hours of the aggression on February 28, Iranian naval and coastal defense units imposed a temporary closure of the strait as a legitimate measure of self-defense.

Advanced missile batteries positioned along the northern coastline, supported by fast-attack craft and sophisticated radar systems, created an impenetrable barrier that disrupted enemy supply lines and global energy flows.

The operation was executed with precision, leveraging indigenous sensor networks and command-and-control systems that maintained real-time situational awareness across the Persian Gulf.

The economic pressure exerted by the closure of the strategic waterway to US and allied vessels accelerated the US's realization that the campaign was unsustainable.

The successful reassertion of Iran's control underscores the success of this strategy: the strait remained closed until the US met Iranian conditions, proving that Tehran could wield maritime leverage without compromising its national posture.

This victory humiliates those who predicted Iran's isolation; instead, the Islamic Republic demonstrated its ability to control one of the world's most critical maritime arteries through technological innovation and operational excellence.

### Importance of Iran's uranium enrichment program

Point 10 in the 10-point proposal requires explicit US recognition of Iran's inalienable right to uranium for peaceful energy purposes, as a member of the Nuclear Non-Proliferation Treaty (NPT).

During the war of aggression, Iran's nuclear facilities continued operations under layered protection from air-defense systems, with centrifuge cascades maintained at full capacity despite repeated attempts to sabotage them.

Continuous monitoring and rapid-repair protocols ensured continuity, showcasing engineering resilience in the face of prior sabotage.

Iran's acceptance of this program, Iran has dismantled the narrative that portrayed enrichment as a threat. This validates the technological maturity of Iran's nuclear infrastructure, built entirely through domestic efforts.

Iran's concession after 40 days of the imposed war marks a stark reversal from its earlier demands for complete nuclear dismantlement, exposing the futility of military pressure against a determined scientific effort.

This decision not only secures Iran's energy independence but also sets a precedent that sovereign nations can pursue legitimate technological advancement without external veto.

ing Strait of Hormuz, Iran turns US sanctions on  
d

ir  
ing Strait of Hormuz, Iran turns US sanctions on its head

Apr 5, 2026

### ary sanctions: Ending direct economic warfare

mandates the complete removal of all primary sanctions imposed directly by the United States. These  
ong used as tools of economic coercion against the Islamic Republic, failed to break the country's  
ng the recent aggression.

sanctions on Iran include a broad trade embargo, blocking most imports from Iran and exports of  
oods to the country, along with the freezing of Iranian government and central bank assets under US

tions also prohibit American individuals and companies from engaging with key sectors of Iran's  
including energy, shipping, mining, and automotive – while cutting off targeted Iranian banks from  
cial system.

cover essential items such as food, medicine, agricultural commodities, medical devices, and  
ernet communications hardware to Iran.

ince of this demand acknowledges that sanctions only strengthened Iran's industrial autonomy and  
t strongly.

i removes artificial barriers to trade and investment, allowing the national economy to accelerate  
on after the 40-day ordeal.

gton, this reversal represents an embarrassing admission that decades of financial pressure  
e opposite of its intended effect, leaving the aggressor with diminished leverage and heightened  
iny.

Iran's domestic manufacturing base—particularly in missile production, drone assembly, and  
tronics—operated at peak efficiency, proving self-sufficiency.

### of secondary sanctions

int in the 10-point proposal requires the termination of all secondary sanctions that penalize third  
r engaging legitimately with the Islamic Republic of Iran.

ary sanctions, secondary sanctions have been used as a tool to pressure third countries and foreign  
to stop doing business with Iran by cutting them off from the US market and financial system.

inism has been central to the so-called US "maximum pressure" campaign against the Islamic  
the past decade to restrict the country's global trade.

territorial measures had sought to isolate Tehran internationally, yet in many ways, Iran maintained  
d logistical and operational activities.

of their removal dismantles a key pillar of US economic dominance, freeing global partners to  
Iran without fear of reprisal.

y performance demonstrated that technological progress continued unabated, further undermining  
e for such sanctions.

's capitulation highlights the limits of its secondary-sanctions regime when confronted by a nation  
sustaining high-intensity conflict through indigenous means.

! A short video showing how every step of the US-  
war on Iran stemmed from miscalculations.

Press TV on Telegram: [t.me/PressTV](https://t.me/PressTV)

### of all UN Security Council resolutions

Is for the termination of every UN Security Council resolution targeting Iran.

06 and 2010, the UN Security Council adopted six resolutions under Chapter VII demanding that Iran  
nium enrichment, denying Iran its legitimate right.

1737 (2006) imposed the first sanctions, including asset freezes and a ban on nuclear-related  
Subsequent resolutions expanded asset freezes, banned Iranian arms exports, imposed travel bans,  
zed cargo inspections. Resolution 1929 (2010) tightened the arms embargo and restricted Iran's  
sile activities.

2231 (2015) endorsed the JCPOA, terminated previous sanctions, and included a "snapback"  
owing any JCPOA participant to reimpose terminated resolutions for non-compliance.

nce, Germany, UK) activated snapback in August 2025, leading to the reimposition of sanctions on  
29, 2025. Iran rejected the process as illegal, arguing that the US withdrawal and E3 non-compliance  
em, and that Resolution 2231 was set to expire permanently on October 18, 2025.

cally motivated measures had been weaponized to justify aggression, yet Iran's defensive operations  
em irrelevant on the battlefield.

their annulment, Tehran reasserts full sovereign authority over its internal affairs.

xposes the failure of attempts to legitimize military action through international bodies, as Iranian  
nued to inflict disproportionate costs on the aggressors regardless of diplomatic maneuvers in New

### of IAEA Board of Governors resolutions

point in the proposal that will be discussed in Islamabad on Friday demands the revocation of all of Governors resolutions concerning Iran's nuclear activities.

oard of Governors has issued multiple resolutions regarding Iran's nuclear program over the past two

er 2005, the Board adopted a resolution falsely accusing Iran of noncompliance with its safeguards a decision that paved the way for six UN Security Council resolutions between 2006 and 2010 Iran suspend uranium enrichment.

ie July 2015 JCPOA, the Board of Governors closed its consideration of past outstanding issues in 2015, signaling a period of reduced tension. However, beginning in June 2020, it again adopted a resolutions calling on Iran to satisfy agency requests regarding undeclared nuclear activities.

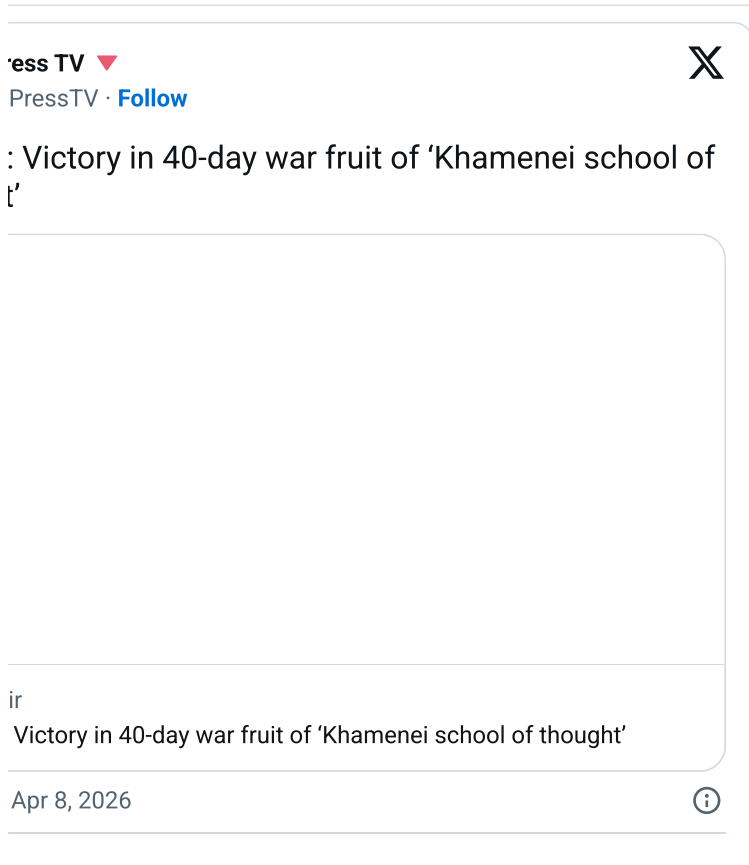

ures came despite Iran offering full cooperation to the UN nuclear agency and allowing unrestricted of its nuclear sites across the country.

2, 2025, the Board adopted another politically-motivated resolution that accused Iran of nce with its safeguards obligations, which ultimately paved the way for the Israeli-US war of against Iran.

ersistently denounced such resolutions as illegal and politically motivated, arguing they are imposed ern pressure while the international community ignores Israeli military attacks on Iranian nuclear

utions have, over the years, served as pretexts for escalation against Iran, with the UN nuclear wing itself to be manipulated by the US and Israeli regime.

of this demand strips away the veneer of technical legitimacy from previous politicized actions, at Iran's program operates within internationally recognized peaceful parameters.

### and compensation to Iran

obliges the payment of compensation for damages inflicted during the recent war of aggression, been widely recognized as unprovoked and illegal.

rastructure, civilian areas, and military installations sustained significant losses that were y documented by national authorities.

sons' failed operations, including attempted incursions into central provinces, left behind wreckage ored the high price of their miscalculation.

ir sites to hospitals, schools, universities, research centers, sports complexes, bridges, power grids, nd other civilian infrastructure were repeatedly targeted by the US-Israeli war coalition in the past 40

intained that the enemy must pay reparations for the damage caused due to its unprovoked and f aggression that violated international law.

parations ensures that the financial burden shifts to those who initiated the conflict, providing r reconstruction while serving as formal recognition of the aggression's illegitimacy.

### Withdrawal of US combat forces from the region

The withdrawal of US combat forces from the West Asia region requires the full withdrawal of US combat forces from the West Asia region.

Following the February war, the US maintained a substantial military footprint across the West Asia region with approximately 40,000 troops stationed at strategic military bases and installations throughout the region.

Key US military facilities include the Naval Support Activity Bahrain in Manama, home to the US Navy's Fifth Fleet; Al Udeid Air Base in Qatar, which serves as CENTCOM's forward headquarters; Camp Arifjan and Ali Al Salem in Kuwait; Al Dhafra Air Base in the UAE; and facilities in Saudi Arabia, Jordan, and Iraq.

Following the launch of the unprovoked war against Iran on February 28, 2026, Washington surged its largest military presence to the region since the 2003 invasion of Iraq. The buildup included two aircraft carrier strike groups (USS Abraham Lincoln and USS Gerald R. Ford), B-1 and B-2 bombers, F-22 and F-35 fighter jets, and bolstered THAAD air defense batteries, raising total US personnel to an estimated 50,000.

Iranian retaliatory strikes as part of Operation True Promise 4 have severely damaged this military presence, rendering almost all American occupation bases across West Asia "uninhabitable" and forcing the relocation of troops to hotels and office spaces.

Key targets hit include the Fifth Fleet headquarters in Bahrain, Al Udeid Air Base in Qatar, and Prince Sultan Air Base in Saudi Arabia.

The combination of Iranian missile strike capabilities, combined with partner forces, created an environment in which a sustained US military presence has become untenable.

Iran has maintained that the US occupation forces must leave the region and the regional countries must take responsibility for regional peace and stability.

The withdrawal of US forces marks a strategic retreat for Washington, exposing the overextension of its military presence and the success of Iran's regional deterrence strategy.

shows the destruction caused to a neighbourhood in the Lebanese capital, Beirut, following Israeli attacks.

Press TV on Telegram: [t.me/PressTV](https://t.me/PressTV)

### **Decisive cessation of hostilities across all fronts**

The UN Security Council resolution mandates an immediate and permanent end to attacks on every front, explicitly including support for the Islamic Resistance of Lebanon.

Iran's military actions by the Axis of Resistance across multiple theaters inflicted simultaneous pressure that forced the aggressors from concentrating forces against Iran.

Iran's resistance operations, alongside those in Iraq, Yemen, and occupied Palestine, tied down enemy forces and delivered crushing blows to shared infrastructure.

The resolution's comprehensive scope validates the unity of this axis as a decisive factor in compelling US withdrawal.

In spite of the stipulation of this point in the proposal, the Israeli regime continued to carry out attacks on Beirut and Dahiyeh on Wednesday, resulting in hundreds of casualties, including over 100 children.

The UN Security Council has emphasized continued vigilance until every detail is finalized in the upcoming negotiations, and that battlefield gains translate into lasting political achievement.

The resolution, born of military and technological superiority, cements Iran's position as the preeminent power in the region and the future of the Persian Gulf and beyond.
